Enterprise Credit Control Software

for

"Collect enables a focussed collection strategy as a result of its ability to organise debtors readily. It reduces the administrative burden of credit controllers by allowing drill-down to debtors transactions on the client information screens."

Sheryl Lee, Financial Accountant, Lend Lease Employer Systems

"We love CollectPro! In the first month alone, we reduced our outstanding receivables by 30%! Our Receivables department is more organized and we've gained a higher level of confidence in the collectability of outstanding invoices."

Dave Root, Comptroller, Eagle's Flight Creative Training Excellence Inc.

"With over 2,000 invoices a week, CollectPro allows us to target overdue customers and track exactly what is being done to collect."

Toby Everett, CFO, Hays Personnel Services

CollectPro converts debtors to cash

CollectPro from Professional Advantage is seamlessly integrated to SunSystems and Dynamics.

Sophisticated functionality includes:

- ✓ Year 2000 compliance
- ✓ Email integration
- ✓ Microsoft Outlook integration

- ✓ User defined account queries
- ✓ Drill down to supporting transactions
- ✓ Assign and track queried transactions
- ✓ Bulk letter processing
- ✓ Manage task lists by collector, action and date
- ✓ Debtor statement printing on demand
- ✓ Reprint sales invoice
- ✓ Multi currency and Euro compliance
- ✓ Internet access with browser interface

CollectPro benefits

Debt collection is one of the last but most important elements in the order fulfillment and customer management process. Extending the convenience of credit to your clients involves significant cost to the organisation. Outstanding receivables must be financed by working capital and even short term delinquency can rapidly affect related profit margins.

Structured collection management techniques can bring significant benefits to your customer relations and will maximise your first pass yield in the collections function. CollectPro aids tracking of your worst debt offenders and helps identify potential delinquency problems before they arise.

CollectPro is seamlessly integrated to both Great Plains Dynamics and SunSystems.
